CORONAVIRUS UPDATE

THBI is actively communicating and working with elected officials, state agencies, industry partners and Texas entities to ensure the state of Texas is on the forefront of combating coronavirus, and taking proper action to keep the state safe during the global outbreak. We will be providing our partners regular updates on how our industry is responding to the epidemic.

Updates from the Texas Legislature

Governor Greg Abbott has led the creation of a Supply Chain Strike Force guiding collaboration between the public and private sectors to ensure health care facilities have the supplies and resources they need to respond to COVID-19.

The Strike Force needs your help to secure necessary large quantities of critically-needed personal protective equipment (PPE) items such as masks (N95 and/or surgical), respirators, ventilators, gowns, and gloves. If you have readily-available supply or can quickly produce large quantities of critically-needed items, please complete the State's procurement form: https://texas.gov/form1.html.

medical and public health professionals, please complete the State's volunteer and donation assistance form: https://texas.gov/form4.html.

If you would like to have other impact by providing

other readily-available items that can assist our

Texas' Response

A New Texas COVID-19 Pandemic Toolkit Shows the Importance of Social Distancing

Since 2012 a pandemic-planning tool developed by researchers at The University of Texas at Austin has helped public health officials plan for the consequences of a deadly and virulent virus. Now the pandemic modeler who developed the toolkit is studying COVID-19 and has built a new model to project the spread of COVID-19 across the U.S.

Biotechnology Innovation Organization

Coronavirus Business Resource Center

As many BIO members work to develop diagnostics, vaccines and treatments to address the global COVID-19 outbreak, BIO has provided resources to

help companies continue their operations with minimum disruption and keep their employees safe and healthy.

BIO Resource Center

Our Members Response

This week, Biotechnology Innovation
Organization (BIO) hosted two-day virtual summit
on COVID-19 bringing together industry leaders,
government officials, and scientific experts to
maximize collaboration on vaccines, therapeutics,
and diagnostics

Key takeaways were the desire to collaborate and work through the crisis as quickly as possible—but this requires collaboration with government, too.
