

THE TEXAS POLICY VOICE FOR HEALTHCARE AND BIOSCIENCE

Patient Access to Innovations and Medicine

Patient Advocacy Event

Thursday, September 29th

Legislative Conference Center (E2.002), Texas Capitol

11:00 am-2:00 pm

Lunch will be provided

Please join Texas Healthcare and Bioscience Institute (THBI) and patient advocate partners to help educate policy makers on advocacy issues and problems patients face while navigating the healthcare system.

THBI is the Texas public policy voice for the healthcare and bioscience industry. Working with our member companies who are creating and producing innovations that save patients' lives and create better health comes, we want to ensure patients remain the ultimate beneficiaries of such advances. As we approach the 88th Texas Legislative Session, it is important to educate our policy makers and their staff, on the issues effecting Texans across the state.

The event will include the opportunity to network and learn about various patient organizations and issues impacting the diverse patient community with an exhibit before and after the program. A full program with topics and speakers will be released soon.

To learn more or to RSVP, email info@thbi.com.
