Join THBI and Bio North Texas for the Dallas/Ft. Worth area “stop” on the Innovation Tour. The meeting will bring together life science industry leaders, economic developers, academic institutions, and policy makers for a panel discussion on how each region’s life science economy is growing, and what is necessary to strengthen Texas’s business environment and continue to create a thriving environment for businesses to grow. After the panel concludes, we will open the meeting up to all attendees for a round table discussion.

PRESENTED BY

MEETING AGENDA

PANEL DISCUSSION

- Overview of life science ecosystem statewide and regionally
- What Texas and the local community needs to compete
- Challenges the region is facing at state and local levels
- How to highlight strengths and positive perception for new and growing companies
